SKILLS

FRONT-END : HTML,CSS,JS,BOOTSTRAP,REACT

BACK-END : NODEJS,PHP,SQL,MONGODB

PROGRAMMING LANGUAGES: C/C++ , Python .

Git and Github

EDUCATION

SRM UNIVERSITY-AP	2022-2026
B-TECH	CGPA:8.92/10.00
GRAVITY COLLEGE,Vijayawada	2020-2022
Intermediate	Percentage:95.1%
NIRMALA HIGH SCHOOL	2008-2020
School	Percentage:77.1%

COURSES AND CERTIFICATIONS

- Data Structures and Algorithms using C/C++
- Object Oriented Programming Using C++
- The Joy Of Computing Using Python(NPTEL)
- Data Base Management Systems

PROJECTS

Personal Portfolio Website: (HTML,CSS,JS,BOOTSTRAP)

- The Personal Portfolio Website serves as a comprehensive platform to exhibit my certifications and skills. It's designed with responsiveness in mind, ensuring seamless accessibility across various devices. Additionally, I've included a separate section dedicated to showcasing my photography portfolio, aiming to highlight my expertise and passion in visual storytelling through captivating imagery and narratives.

SRMAP Student Portal CLONE (HTML,CSS)

- I have designed a Clone SRMAP Student Portal To increase my knowledge in CSS selecting and to understand more about responsive members

A-To-Z Supermarket Billing System (C++ Object Oriented Programming)

- This project is a robust terminal-based billing system customized for A-to-Z Supermarket, featuring user and administrator logins for secure access control. Users can log in via their mobile numbers, while administrators use designated email IDs, ensuring distinct privileges. Using CSV files for efficient data storage and retrieval, the system manages crucial information like product details and transaction records, enhancing scalability and maintainability.
- This hands-on experience underscores my ability to design and implement practical solutions for complex business requirements.

HOBBIES

- Photography
- Competitive Programming
- Learning New Tech Skills
- Playing Chess
- Gaming
- Designing Mini Games
